

A Special Study of the Incidence of Retardation Volume 40

By Louis Benjamin Blan

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 Excerpt: . 13 Five Schools. Age-grade Table Showing Sex Distribution Boys in plain type. Girls in italics. In the schools of Elizabeth there seems to be no doubt concerning sex difference in retardation. In every instance as shown in the preceding table the boys are more retarded than the girls. The median for the 529 cases (boys) in grades 4 through 8 is 79.6; whereas for the 559 cases (girls) it is 76.5. In the two upper grammar grades the boys as compared with the girls show relatively more over-ageness than in the two lower grades. With both sexes the same progressive increase in retardation is noticeable (see charts 5 a and 5 b) in descending from the eighth to the fourth grade. Were the theoretical age limit for the fourth grade taken to extend from 9 to 11 years, for the fifth grade from 10 to...
