

Reports on Observations of the Total Solar Eclipse of December 20, 1870

By United States Naval Observatory

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1871 Excerpt: . over the Anapus River. The measurements were made on December 20, with my Chesterman s metallic tape-line, which is too long in the proportion of 100.134 to 100.000. This explains the origin of the column, Corrected distances, in the following table giving the details of the measurement of the base-line: The following table gives the results of the successive steps in reducing this base to a straight line: On December 20 and 21, Professor Hall and I executed, upon this base, the triangulation shown in Fig. 5, which is drawn on a scale of 1 to 15,000. The different stations are designated in the figure by numerals, as follows: 1 is the Stone Gun-Platform, the position of which is described on page 48. 2 is the Light-House on Maniace Castle. 3 is the highest point in the center of the faqadc of the cathedral, which...
