Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Behavior Change in Transitional Roles Most methods for changing human behavior are primarily concerned with the alteration of psychological processes within the individual. They customarily give little attention to the social environment in which the attempts to change behavior occur. Yet human behavior is constantly immersed in a social context. Our actions are predicted and controlled by our associates and we likewise demand that others fulfill our expectations. It is, in fact, through these stable and mutual patterns of expectation that we are able to function in highly developed and specialized society. Individual personality change creates a problem for these mutual expectation and interaction patterns. If changes in behavior are to be maintained, the social environment must be altered to integrate the new identity and re-establish that equilibrium which allows others to predict our actions and empathize with our feelings. The social environment influences and is influenced by any change in behavior from the alteration of insignificant habits to the total reorganization of personality. A typist who finally masters the typewriter makes it inappropriate for her boss to vent his frustrations by ordering much-erased letters to be redone. A former drug addict, if his abstinence is to be maintained, must develop a new circle of associates who will lead him to the non-addict world of a steady job and to life with the squares he formerly despised.
