Springer-Verlag New York Inc., United States, 2011. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The focus of this symposium was on the present and future capabilities of flow cytometry for both medical and biological applications in cancer. This technology began with quite modest instrumentation, with limited capabilities to answer biological questions. Today, both the clinical workhorses and the powerful multi-laser, multi-detector, sorting machinery, coupled with sophisticated computers and storage devices and the increasing storehouse of markers and dyes, are taking us to the limit and beyond in finding answers to the cause and cure of cancer. In the past, both normal hematopoietic tissue and leukemias have been the tissue samples of choice in the application of flow cytometry, and some of the most recent applications with these tissues are presented here. However, the book also discusses the increasingly sophisticated disaggregation techniques which allow investigators the possibility to train their lasers on solid tumors. Not only can we use flow cytometry with associated fluorescent markers to understand the biology of cancer, but also the wide array of existing and developing markers provides us with important diagnostic tools in the detection of cancer early in either...
